

Phase 10: Final Presentation & Demo Day

Objective The objective of this final phase is to consolidate all project work into a comprehensive deliverable for submission. This includes preparing a complete set of documentation detailing each phase of development and producing a video demonstration that showcases the live, functional "Make Parking Easier" application.

Key Activities & Screenshots

- **Video Demonstration:** A screen recording was created to provide a live demonstration of the application's key features. The demo flow included:
 - A tour of the internal "Make Parking Easier" app.
 - A showcase of the custom Lightning Web Component counting available slots.
 - A live test of the Flow automations for booking and freeing up a slot.
 - A review of the "Bookings by Status" report and the visual "Parking Dashboard".
 - A successful test of the secure customer portal, previewed from the perspective of a logged-in customer viewing their own bookings.

Outcome The project successfully concludes with the delivery of a complete documentation package and a video presentation. The final deliverables effectively demonstrate a fully functional, scalable, and secure smart parking solution built on the Salesforce platform, meeting all the initial project requirements.
